SAMSUNG 360 Cassette

Well rounded

A truly circular cassette.

Enjoy even airflow from a beautifully sleek design that fits into any setting.

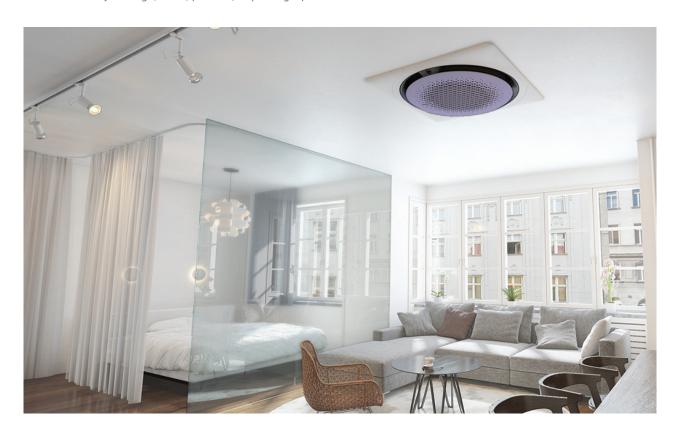

A round of applause

This truly innovative system provides surround airflow evenly throughout the space. Available in black and white, you can choose a circle or square fascia panel.

Samsung now offers custom printing on 360 Cassette panels so you can personalize the look and feel of your space with custom graphics or colors. Use your logo, color, pattern, or photograph in order to blend in or stand out.

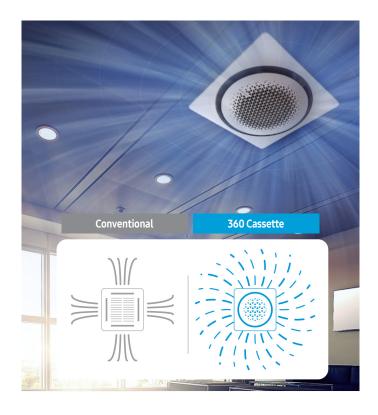

Bladeless beauty

Standard 4-way ceiling cassettes use blades on 4 sides of the unit to distribute air. This 4-sided distribution can cause up to 25% reduction in airflow and creates uneven room temperature, resulting in hot and cold spots. With bladeless technology and the use of 3 booster fans, the 360 Cassette provides even, horizontal airflow.

The booster fans can be individually set at the same or different angles within a 10-60° range. The swing function is available when all 3 booster fans are operating in unison.

Cool from every angle

The 360 Cassette is available in a wide range of heating and cooling capacities to fit commercial and light commercial applications. Its innovative circular design can match a multitude of interior designs, so it perfectly fits in everywhere.

- Available as a 1-1 CAC system and models are also available for DVM S systems
- A Motion Detection Sensor (MDS) will automatically turn off or change the set temperature based on room occupancy, and learn occupancy patterns to reduce run time between occupied and unoccupied times. Use of MDS is optional (sensor sold separately).

Wi-Fi Adapter

Samsung's Wi-Fi Adapter allows for remote control and monitoring of Samsung indoor units from a mobile device (Android or iOS) when using the Samsung SmartThings App*.

App Features

- Daily, weekly, and monthly energy consumption monitoring†
- Basic control and monitoring of power, mode, set temperature, room temperature, fan speed, supply air louver position and filter reminder
- 7-day scheduling for single or multiple units

WI-FI ADAPTER

Max. Wi-Fi Adapter Quantity Per System				
CAC Single Zone Systems	1			
DVM S Systems	4			

One MIM-H04UN Wi-Fi Adapter can control up to 16 indoor units connected to multiple systems or on a single DVM S system. If the DVM S system has more than 16 indoor units, connect a maximum of 4 adapters for control of up to 64 indoor units on the same system. Group configuration allows for simple control of multiple units connected to the same Wi-Fi Adapter.

Individual Control

There are many different ways to control a Samsung system. For applications where a wireless controller is not acceptable (i.e. public facilities), the Touchscreen and Advanced wired controllers are available to purchase as an option. Visit SamsungHVAC.com to learn more.

Central Controls

Samsung's Data Management Server (DMS) lets you monitor and control your on-site air conditioning needs remotely. It's the easiest and most convenient way to manage a large number of air conditioning units at once.

DMS 2.5

- 24-hour standalone web-server
- No special software required
- All management functions integrated
- Heat Pump auto changeover logic
- DMS 2.5 + BACnet and LonWorks available
- BACnet and LonWorks gateways will connect and setup the same as DMS 2.5

DMS 2.5 MIM-D01AUN

Additional control options available. Please refer to <u>SamsungHVAC.com</u> for all control options, features and specification.
