

## ADP Air Handler Model AX Wired to HMH7 Heat Pump Using HMH7AK001 Relay Kit

Note:

The purpose of the relay kit is to allow the HMH7 unit to energize a lower fan speed when it reduces its capacity.

Thermostat must be configured for heat pump using B for reversing valve operation.

W1 and W2 only used if electric split heaters are installed in air handler, confirm thermostat selected has W1, W2 capability.
